

## WHAT ON EARTH IS GOING ON?

**Why** does the media (and Greta) say there's a climate crisis when 97% of climate scientists say there isn't?

**Why** the talk about net zero when experts say Co2 is already low and if it drops any further, all life could end?

**Why** all the white trails and strange looking clouds? Are jets showering us with poisonous substances?

**Why** are farmers worldwide being pushed out of farming? Is it true Bill Gates' wants us to eat insects?

**Why** are councils dividing cities into gated zones that people can only leave 100 times a year. Oxford is one.

**Why** have Covid jabs when the makers say they don't help with infection, survival, recovery or transmission?

**Why** are many parents rejecting vaccines for their kids? Do they know the unvaxed are the healthiest around?

**Why** does Bill Gates want to cull nine-tenths of the world's population? Could it be connected to the above?

**Why** does none of this appear in mainstream news? Is it because Bill Gates controls the worldwide media?
