

BEWARE THE INVISIBLE ENEMY

Drawn from a Telegram conversation

Sarscov2 was entirely fake. It does not exist except as a fabrication inside the software and hard drives of some computers as do all their claimed genomes. (<https://t.me/TruthSignalschat/13952>). This particular issue spans not just Covid but all Bill Gates' and Big Pharma's murderous excursions into Africa and India – and the entire world. Someone has to explain this to the public and it's actually not that hard to explain. It's very dangerous for the political and medical establishment though.

Meanwhile they will be killing all the chickens and cattle etc based on nonsense and declaring new pandemics, which they are itching to do with the WHO pandemic treaty. This will knock on into the construction of digital prisons and the surveillance state to protect everyone against their fake infections.

You can see how beautifully useful this is. Anything invisible fits the bill for them, including viruses and climate change. Both bollocks and both give them endless opportunities for control.

Attacking the entire virus narrative goes straight to the jugular of their operation and pops the entire justification for it, which is why they are so intent on demonising so-called antivaxxers. Boris J was getting an early pop in during his tech speech to the UN in September 2019, just before this psyop was put in motion. If not now then, when?

There are plenty of books out there such as Virus Mania and Jon Rappaport's AIDS INC and the word is slowly seeping out. Perhaps it will turn into a flood the next time the fools try this. We can only hope but in the meantime children are being jabbed with up to 76 doses of muck before they are 18 with only harmful effects and for no reason except to provide income to Big Pharma and politicians.....and to provide a fear narrative. These people will NEVER debate on this subject in public because they know it's tosh.
