

THE AGE OF ABNORMALITY

By Jackie

Is all we call normal
Actually abnormal?
Or are we being normalised to believe
The abnormal
Is now the normal?

Has good become evil
is evil now OK?
Is it abnormal to question authority?
Are forever wars normal?
They tell us we are living in
The age of the 'new normal'
I believe we are living in
The Age of Abnormality.

Since the advent of Covid
And it's miracle vaccine
It is now normal for people
To die of heart attacks and stroke
when they are under 50
A new expression is invented:
Sudden Adult Death Syndrome
In order to normalise
An abnormal occurrence
Strange, that before Covid I had only
heard of Sudden Infant Death Syndrome.

It's also becoming normal for
children to die of strokes too
(We must have defibrillators
in every school).
I don't remember anyone dying
In any of the schools I attended.

An epidemic of excess deaths
Among the young
around the world
"cause of death not known"
Nothing to see here
Athletes have always dropped dead
On the pitch.
It's not abnormal.

One in 2 will now get cancer
One in 11 children is now autistic
Allergies and asthma through the roof
This is the new normal
Because it's all been normalised.

What is normal for me is to question.

To look at the stats
to look at the facts
Children in the U.S.
Are now subjected to 32 vaccines
Before they are twelve months old.
Parents are screaming that
Their child was "normal" prior
To getting yet another jab.
The graphs show the rise in autism
Exactly equates with the
Increase in vaccinations.
But it's perfectly normal.
Nothing to see here.

Our mobile phones
And their hypnotizing destructive effects
Have been normalised
The internet is
Business as usual.
Paying with a credit card and not cash
Normal.
Soon ID cards will be normal too.
And Social credit scores
And being continuously surveilled
Should we step outside our
15-minute city
One time too many.
It will all be normalised
And become perfectly normal
And we will all comply.

Having drag queens in primary schools
Or reading books about sex
And gender identity before children
Are mature enough to understand such things
Is being normalised.
Pick your own pronoun
He/she/they/them
72 genders to choose from
Take your pick.
Perfectly normal.

Men who identify as women
Winning in women's sports
And invading women's spaces
We are being normalised to
Accept that it is
And anyone who questions
Is labelled abnormal
and transphobic.

Enquiries into the Pakistani rape gangs
Voted against in Parliament

Can't upset the Muslim vote
upon which this government relies
Or expose the perversion of
our own government
In their complicity.

Natural fluctuations of our climate
No longer part of nature
No longer normal
We are told to believe that chemtrails
Are natural clouds or contrails
I look up at the sky
Criss crossed with long plumes of
Slowly expanding "clouds",
never seen in the past
And I say out loud
"This is NOT a normal sky"
But it is being normalised
And still goes unnoticed by most.

Can dropping a 2000 lb bomb
On a tent full of refugees be normal
It's no longer normal to look after
Our own interests
Let the state do that for you.

I don't claim to be normal
But I have learned to
believe in nothing
and question everything.
Normalisation is the death
Of critical thinking.

I believe in freedom of speech,
and thought, and protesting
the Dystopian agenda
they are trying to normalise.

I will go down fighting
I refuse to tolerate the intolerable
Or accept the propaganda
And being told what to think
I have no intention of adapting
To the new (ab)normal.
