

# How to Fake Pandemics

By Sasha Latypova

## 1. Pandemics do not occur naturally.

They are a fiction used by the deep state psychopaths to install global tyranny. There has never been a mass illness and death affecting the entire planet or multiple geographies simultaneously.

- [Nothing to declare](#)
- The idea of deadly, highly transmissible viruses being created in labs or jumping from animals to humans and causing global pandemics is a deliberate science fiction concocted by the “biodefense/biosecurity” global mafia. [“Weaponized pathogens” cannot cause pandemics](#), as [Ralph Baric explains](#)
- True “gain-of-function” research that produces such viruses is impossible because its [underlying scientific theory has been falsified](#) in numerous ways. See [Fraudulent “science” of weaponized viruses](#).
- [It is impossible to make “ethnically targeted” viruses](#)
- [Pfizer failed to make animals sick from SARS-Cov-2](#)
- [Scientists failed to make people sick from SARS-Cov-2](#)
- No, the Black Death was not a pandemic either, it was a flea-borne bacterial illness affecting crowded medieval European cities due to sorely lacking sanitation. [ref]
- No, the “Spanish Flu” was not a real pandemic either. [The inappropriately named “Spanish Flu” was severely misrepresented](#) as a “pandemic”, decades after the fact. [It wasn’t considered one by the International Sanitary Convention](#) (predecessor to WHO, 1850 - 1949), also [here](#), and [here](#).
- Most bacterial/insect vector-borne disease outbreaks [are explained by lack of sanitation and anaphylaxis by animal/insect bites](#)

Pandemics do not exist naturally, but instead, they are orchestrated by the military-industrial globalist cabal to achieve objectives of control, profit, and eugenics/population management.

## 2. Key Entities Involved:

- **US Government Agencies:** Department of Defense (DOD), Department of Health and Human Services (HHS), Central Intelligence Agency (CIA), Biomedical Advanced Research and Development Authority (BARDA), Food and Drug Administration (FDA). These agencies collaborate under initiatives like the Public Health Emergency Medical Countermeasures Enterprise (PHEMCE).
- **World Health Organization (WHO):** plays a role in declaring “Public Health Emergencies of International Concern” (PHEICs), which can trigger pre-planned responses and potentially be formalized through a pandemic treaty.
- **Pharmaceutical Companies:** Such as Moderna and Pfizer, are collaborators in the development and distribution of “medical countermeasures”.
- **Academic Institutions and Researchers:** producing falsified research and fear-mongering narratives to support the “pandemic preparedness” racket. Figures like Ralph Baric, Peter Daszak, and Anthony Fauci are just few out of thousands

of academics whose job is to lie and produce fake science for propaganda purposes.

- **Media:** Mainstream media is a tool for disseminating propaganda and fear.

See Covid Dossier for details about the global military operation and key entities involved in many countries of the world:

[The Covid Dossier, Updated: A record of military and intelligence coordination of the global Covid event.](#)

[Read full story](#)

### 3. Objectives of Faking Pandemics:

- **Manufacturing and Stockpiling Bio-chemical Agents:** Under the guise of "pandemic preparedness" and "countermeasure development" government agencies and pharmaceutical companies engage in the research, production, and stockpiling of bio-chemical agents. [ref] These activities are often conducted in academic, government and private biolabs, which are presented to the public as necessary for defense against naturally emerging threats [ref]. Periodic [pretend "banning" of "dangerous GOF work"](#) and [here](#) is not designed to stop these activities, especially as it relates to the military weapons making and is designed to both, [perpetuate the public fear in non-existent "existential threats" of GOF viruses](#) and provide cover and financing for the biodefense mafia. They use a cover of "infectious disease research" however, it is impossible to regulate which of these studies are for infectious disease and which ones are for making bioweapons. It is largely a waste of taxpayers money, and it also funds military programs ([like this study with participation of Amplify Bio, JD Vance's company](#)) where they work on creating poisons in a similar manner to the underground CIA operated labs in the 1940-50's as described in the book by Ed Haslam, "Dr Mary's Monkey" - poison the animals, then collect the results of poisoning (e.g., tumors or brain tissue), then derive new biological poisons from these samples.
- **Establishing Global Control and Enslavement:** To implement a global government regime of control, including tracking, tracing, digital IDs, and digital passports. [ref], [ref], [ref]
- **Population Reduction (Depopulation Agenda):** Some sources suggest a deliberate effort to reduce the global population, possibly linked to documented US policies. [ref]
- **Economic Gain and Asset Transfer:** To facilitate a massive upward transfer of wealth, loot public money, and establish new financial systems like Central Bank Digital Currencies (CBDCs). The role of "pandemic bonds" in this financial scheme is also mentioned. [ref]
- **Creating a Government-Dependent Slave Class:** By making people dependent on an expensive healthcare system, welfare, and susceptible to propaganda.

For historical perspective, see "Eugenics to Pandemics" documentary [\[ref\]](#)

### 4. Methods for Faking Pandemics:

#### Declaring a Public Health Emergency and Utilizing Legal Frameworks:

- Government declarations of pandemic emergencies require zero justification and can be used to imprison and kill people without any due cause or process under pretenses of quarantine [ref]. [Pandemics are arbitrary declarations](#) by the HHS Secretary.
- [Declaration of a pandemic sets up a legal cage](#). The declaration of a Public Health Emergency (PHE) by the HHS Secretary is a trigger for the deployment of weapons systems, including lies, propaganda, fear mongering, censorship, poisoning weapons wrapped in false labels, and perverse financial incentives to those who deploy them (even onto themselves) under the Public Readiness and Emergency Preparedness (PREP) Act.
- Emergency Use Authorizations (EUAs) are used to bypass normal regulatory processes for "medical countermeasures," which are considered non-investigational chemical substances. See [EUA Countermeasures collection](#).
- These legal frameworks provide liability protection for those deploying these "weapons". [ref]
- Prior pandemic simulation exercises, such as "Event 201," have served as rehearsals to brainwash government officials, corporate executives, academics and the public at large and ensure a coordinated global response when the trigger words and images get plastered all over media.

#### **Deployment of Bio-chemical Agents (Hoax Bioweapons):**

- Non-deadly, largely chemical or synthetic toxins, so-called "bio-mimetics" (i.e. agents that produce symptoms that can be claimed as viral in origin) are deployed to cause unusual symptoms in a limited number of "sentinel cases". [Pandemics are faked: the DOD script](#) and the [Dutch/Erasmus script](#).
- The deliberate poisoning of a few individuals in geographically diverse locations with agents causing specific symptoms (the "sentinel cases") serve as the initial evidence to drive panic over the alleged outbreak.
- Deployment methods could include aerosols, ingestion, or even pre-existing injections marketed as flu vaccines. [ref], [ref]

#### **Orchestrating Propaganda and Fear:**

- A massive, coordinated propaganda campaign across mainstream media, entertainment, and government sources is allegedly used to induce widespread fear and anxiety. As an example, [the USAID grant was awarded by the Department of Defense to Reuters](#), describing the project as "LARGE-SCALE SOCIAL DECEPTION (LSD)".
- Concepts like "asymptomatic spread" and "precommunicable" stages of illness are key elements in this fear narrative.
- This constant brainwashing aims to program the masses to react predictably to trigger words like "novel virus" and "pandemic". [ref]

#### **Manipulating PCR Tests:**

- By using specific primers and running the Polymerase Chain Reaction (PCR) tests at a high number of cycles false positive results can be easily generated. [ref], [ref], [ref]
- Forcing mass PCR testing of healthy people (claiming asymptomatic viral spread) and generating lots of false-positives creates the illusion of widespread infection with a "novel virus".

- Mass testing of people on admission to hospitals for other issues, or testing deceased (from unrelated causes) creates the illusion of “novel virus” caused illness, without any virus needed to exist.

#### **Implementing Hospital Murder Protocols:**

- Once individuals are falsely diagnosed, deadly hospital protocols, including the denial of proper treatment, dehydration, starvation, use of remdesivir, narcotics and ventilators are employed to cause deaths that are then attributed to the fake pandemic. Often out-of-state doctors and nurses including individuals with faked credentials has been involved in pulling off the hospital murders. I have first-hand knowledge of these protocols [as they were attempted against my family member](#). Also [here](#).
- Massive financial incentives were utilized to promote the hospital murder protocols, while physicians and nurses who refused to administer the protocols were punished and removed from the healthcare system. Many were prosecuted for speaking up.

#### **Exploiting the "Pandemic Preparedness" Racket:**

- “Pandemic preparedness” is a federal quasi-government racketeering enterprise and a trillion dollar industry designed to generate profits and expand governmental control. [\[ref\]](#), [\[ref\]](#)
- [Pandemics are a government-pharma racket - Col Matt Hepburn \(DARPA\)](#)
- [Biodefense is a global pandemic racketeering enterprise](#)
- This racket involves significant financial investment in "medical countermeasures" that the perpetrators seek to monetize through faked public health crises. See The Cult of Biodefense [\[ref\]](#).

#### **Conclusion:**

Faking pandemics involves a multi-faceted strategy encompassing the deployment of bio-chemical agents, manipulation of diagnostic testing, implementation of harmful medical protocols, widespread propaganda and fear-mongering, leveraging legal frameworks to bypass regulations and ensure liability protection, and exploiting a pre-existing "pandemic preparedness" infrastructure for financial gain and control. The narratives of naturally occurring or lab-leaked deadly viruses are dismissed as fabrications used to deceive the public. The ultimate goals global control over resources, people and infrastructure, population management, and financial gains for the perpetrators of this fraud.
